

NEWS BULLETIN:

WE'RE EXPANDING OUR SERVICES!

Arkos continues to grow our business as a Total Services Capabilities Company throughout the US. We have recently expanded into Indiana, PA to add compressor components and valve repair services to this area. This provides us even more capabilities, along with the experience to deliver the best service and value in the industry. We service the entire Northeast utilizing our skills from multiple facilities. Contact us for more information.

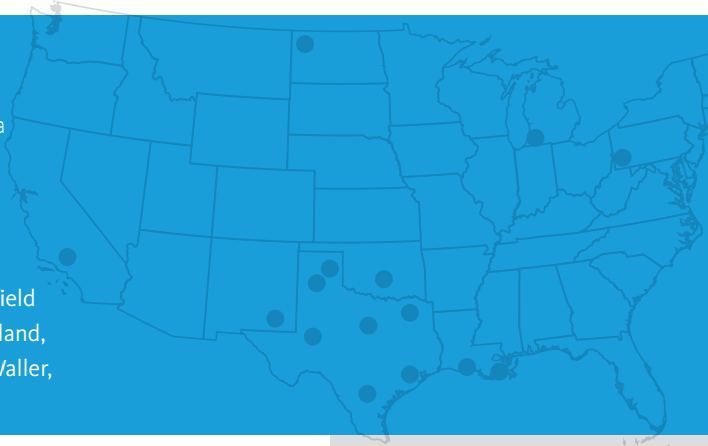

COMPRESSOR VALVES AND PACKING CASE REPAIRS

We specialize in the repair of all makes and models of compressors, valves, and packing cases, supplying detailed reports and pressure tested certificates with every order. Arkos has the experience and parts on hand to provide your company the fastest service; same day turn around available in many cases. We perform the highest quality work at competitive prices and currently service many of the known producers in the region.

Operating Facilities:

- California | Santa Clarita
- Louisiana | Houma, New Iberia
- Michigan | Bridgman
- North Dakota | Williston
- New Mexico | Carlsbad
- Oklahoma | El Reno
- Pennsylvania | Indiana, Smithfield
- Texas | Canadian, Kilgore, Midland, Odessa, Pampa, Three Rivers, Waller, Weatherford

AFTERMARKET SERVICES

Arkos' services maximize asset utilization, and our strategically located facilities provide rapid turnaround. Our part sales department offers a full range of certified replacement parts for newly acquired or relocated equipment to keep operations running efficiently. Our strong supplier relationships maximize our buying power, enabling us to create a critical spare parts list for each unit or facility to keep parts stocked at the closest Arkos location. We also offer technical service and maintenance through qualified third parties on any or all instruments associated with production equipment in-house or on-site.

HIGHLY TRAINED PERSONNEL

Arkos' comprehensive Technical Education system offers structure for our highly trained Service Technicians through Master Technician certifications. Specialized training activities are conducted at the regional locations or vendor sites, and our programs are modeled to meet the regulatory requirements of DOT, Operator Qualification, and compliance certification.
